Ethics Across the Professions Wayne Vaught, Robert C. Solomon, 2010 What does it mean to be an ethical professional? A professional career can be so demanding that it permeates every aspect of a person's life and personality. In light of this fact, it is especially important for students who are planning to enter a chosen profession to understand its moral status, moral virtues, and possible moral pitfalls, so that they will be equipped to deal with the inevitable moral quandaries that they will encounter as professionals. The most up-to-date professional ethics reader available, *Ethics Across the Professions* analyzes the complex ethical issues that arise in such fields as engineering, finance, healthcare, journalism, and law. Featuring a wide array of both classic and contemporary sources, it ranges from works by Aristotle and Kant to selections by Michael Bayles, Sissela Bok, Paul Ekman, and Thomas Nagel. Organized topically, the anthology covers what it means to be a professional, outlines several ethical models, and addresses key issues including deception in professional life, privacy, loyalty, social welfare, conflicts of interest, and self-regulation. The book includes detailed chapter introductions, several practical case studies at the end of each chapter, and provocative discussion questions on issues like -whistle-blowing, - the Iraq War, educating illegal immigrant children, and advertisements for pharmaceutical companies. Edited by three renowned ethicists, *Ethics Across the Professions* is especially suited for introductory professional ethics courses taught in philosophy departments as well as in nursing schools, business schools, and other professional programs.

Profession, Code, and Ethics Michael Davis,2002 This book offers a systematic analysis of professions, emphasizing not special knowledge but special obligations. Presenting a theory of professions which explains the moral authority of professional codes, this book presents an invaluable combination of systematic theory with detailed consideration of specific questions of professional ethics. Three 'professions' are chosen for comparison - lawyering, engineering and policing. Both lawyering and engineering are examined as professions in being. Davis explores what police have to do to turn their honest

occupation into a profession like law or engineering, arguing that what the police lack is not education (as sociologists would propose) but a set of standards beyond that which law, market, and morality demand, to which they are willing to commit themselves .
