Leadership, Management, and Organisational Theories. A Critical Literature Review Patrick Lukasiak, 2020-10-05
Scientific Study from the year 2020 in the subject Business economics - Business Management, Corporate Governance, , language: English, abstract: In the context of the Leadership Management and Organisation Theory (LMOT), the present paper is a critical literature review of organisation, leadership and management literature. The evaluation requires to identify, explore and interpret those aspects of organisation, leadership and management theory that cast light on organisational dilemmas, complexities and nuances which are appropriate to my research objectives and identify gaps in the literature to which my research programme will contribute. It is necessary to make informed judgements that involve a synthesis of relevant fields of leadership, management and organisation theory that are relevant to my proposed area of research. Furthermore, it is required to demonstrate ongoing development of the appropriate standard of written presentation necessary to be able to demonstrate original thought and to present critical and sustainable arguments to peers in professional and academic domains. Since the topic has a strong relationship to my research topic it was for logical reason obvious to include also literature review on organizational success factors which relates strongly to start-ups and agile management since the founder has a central role to conduct and implement agile management into the organization.

Middle-leadership Literature Review and Document Analysis, 2023 This systematic literature review and document analysis informed the development of the draft Professional Standards for Middle Leaders. It is based on national and international literature relating to middle leadership, both theory-based and original research, including relevant grey literature, such as professional standards, professional development programs, position descriptions and policy documents from government bodies and institutions. Key findings include that middle leadership is a balancing act; middle leaders are

critical to improving teaching and learning; and undertake diverse roles in vastly differing contexts. [Publisher summary, ed]

What Is E-Leadership? Probal DasGupta,2013-01 Leadership is one of the most observed and least understood phenomena on earth J.M. Burns (1978). What is leadership? Why do people follow some individuals? How do these individuals influence people to follow them? Must leaders be born with certain special traits (leadership qualities) that cannot be learned? Is it possible to teach leadership and develop leaders? Is there a difference between a leader and a manager? Must managers be leaders too? Should leaders have management skills? Questions. Questions. Questions. This publication is a review of scholarship on the relatively new phenomenon called e-leadership (largely a result of globalization), where leaders may be geographically disconnected from their teams, and connected only through computers, the Internet, and other communication mediums.

The Oxford Handbook of Leadership and Organizations David Day,2014-05-20 As the leadership field continues to evolve, there are many reasons to be optimistic about the various theoretical and empirical contributions in better understanding leadership from a scholarly and scientific perspective. The Oxford Handbook of Leadership and Organizations brings together a collection of comprehensive, state-of-the-science reviews and perspectives on the most pressing historical and contemporary leadership issues - with a particular focus on theory and research - and looks to the future of the field. It provides a broad picture of the leadership field as well as detailed reviews and perspectives within the respective areas. Each chapter, authored by leading international authorities in the various leadership sub-disciplines, explores the history and background of leadership in organizations, examines important research issues in leadership from both quantitative and qualitative perspectives, and forges new directions in leadership research, practice, and education.

Leadership Sait Revda Dinibutun,2020 This paper provides a comprehensive literature review on the research and theoretical framework of leadership. The author illuminates the historical foundation of leadership theories and then clarifies modern leadership approaches. After a brief introduction on leadership and its definition, the paper mentions the trait theories, summarizes the still predominant behavioral approaches, gives insights about the contingency theories and finally touches the latest contemporary leadership theories. The overall aim of the paper is to give a brief understanding of how effective leadership can be achieved throughout the organization by exploring many different theories of leadership, and to present leadership as a basic way of achieving individual and organizational goals. The paper is hoped to be an important resource for the academics and researchers who would like to study on the leadership field.

Responsible Leadership Nicola M. Pless,Thomas Maak,2012-11-27 These chapters on 'Responsible Leadership' represent the latest thinking on a topic of increasing relevance in a connected world. There are many challenges that still remain when it comes to establishing responsible leadership both in theory and practice. Whilst offering conceptualisations

for the improvement of leadership is a first and perhaps easier response, what is more difficult is to facilitate the actual change to happen. These chapters will not only generate interest in the emerging domain of studies on responsible leadership, but also will pave the way for future research in this area in the years to come. Intentional Leadership Stan Amaladas, 2017-07-20 This book provides a framework for guiding leaders to shift from linear, cause-effect thinking to an ecology of moral, intentional leadership, paying attention to how their actions are connected to others. Readers are encouraged to act in a determined, deliberate way to lead their employees, teams, and organizations to success. The book is divided into three parts, opening with a narrative review of leadership literature, then discussing the activities of 11 leaders—including Pope Francis, Barack Obama, and Lee Kuan Yew—and developing a

learning framework for real change. The author provides an enlightened, democratic model of leadership, helping readers to understand and utilize the core competencies of intentional leaders: interruption, presence, imagination, and action. A user-friendly structure, examples from diverse leaders, and end-of-chapter summaries encourage students to engage and experiment with traditional research and alternative theories. This will be a useful tool for students of leadership, and peace and conflict studies, as well as practitioners and emerging leaders in the public, private, and not-for-profit sectors.
