Return Of the Fallen Rita Vetere,2011-10-17 When a fiery Nephilim goes rogue, there's only one thing to do: Take cover. Israfel, the only member of the fallen race in existence, is on a mission: kill Jared Crow, head of a secret organization known as The Order, and the man who murdered her friends. She's highly trained in the martial arts, skilled in weaponry and won't allow anything to stand in her way, not even her mortal lover, Edmond. Unable to dissuade Israfel from hunting down Crow, Edmond joins her. He's only along for the ride, but it's one he'll wish he'd never taken. Raziel, the last Watcher on earth, has taken refuge in the desert, far from the mortals he is duty-bound to protect. Though tired of the task after

thousands of years of lonely servitude, when he detects a threat to the Symphony--the universal flow of all living things--he has no choice but to track the dissonance. Knowing sooner of later Israfel must die, he joins in the chase. Jared Crow has an agenda none of them could have foreseen—and he's got some powerful help in the form of the Dark One. Nephilim, mortal and Watcher--it will take all three to reverse what Crow has set in motion. 27,000 Words

Critical Laboratory Thomas Hirschhorn, 2013-07-19 Writings by Thomas Hirschhorn, collected for the first time, trace the development of the artist's ideas and artistic strategies. For the artist Thomas Hirschhorn, writing is a crucial tool at every stage of his artistic practice. From the first sketch of an idea to appeals to potential collaborators, from detailed documentation of projects to post-disassembly analysis, Hirschhorn's writings mark the trajectories of his work. This volume collects Hirschhorn's widely scattered texts, presenting many in English for the first time. In these writings, Hirschhorn discusses the full range of his art, from works on paper to the massive Presence and Production projects in public spaces. "Statements and Letters" address broad themes of aesthetic philosophy, politics, and art historical commitments. "Projects" consider specific artworks or exhibitions. "Interviews" capture the artist in dialogue with Benjamin Buchloh, Jacques Rancière, and others. Throughout, certain continuities emerge: Hirschhorn's commitment to quotidian materials; the centrality of political and economic thinking in his work; and his commitment to art in the public sphere. Taken together, the texts serve to trace the artist's ideas and artistic strategies over the past two decades. Critical Laboratory also reproduces, in color, 33 Ausstellungen im öffentlichen Raum 1998-1989, an out-of-print catalog of Hirschhorn's earliest works in public space.

Historical Dictionary of Iran John Henry Lorentz, 2007 Provides an overview of specific events, movements, people, political and social groups, places, trends, and chronology. A Mystery in Clay Kevin James, 2008 At the outset, A Mystery in Clay evolved out of a sense of curiosity surrounding an enigmatic disk unearthed on Crete, the famous, or perhaps infamous Phaistos Disk. The strangeness of the object itself has inspired many attempts to decode it. The fact that none of these attempts have been provably successful has inspired a groundswell of alternative approaches, rather than a sense of resignation or fatalism. In this respect, attempts to decode the disk are not unlike the reason we 'climb Mount Everest'. The disk is every bit as much as uncharted territory. However, any realistic attempt to decode the disk not only employs Cryptology, but leads down the unknown path of modern Linguistics as well. At the outset, the reader possesses none of the tools of either Cryptology, or modern Linguistics, and so deciphering the Phaistos Disk can be thought of as an entertaining exercise that is not unlike an 'extreme' vacation where the adventurer is given a knife, a flint, and left to his own devices out on the plains of Africa, or in the Everglades. The question then becomes, can we develop the tools and techniques necessary to survive? Here, survival means developing the ability to render at least a rough approximation of what the disk might say, given the crude original tools at our disposal, in this case the internet and our brains.

The Coming Energy Revolution Jeane Manning, 1996 There is a new and exciting revolution coming. It will dramatically change our landscape, our environment, our economy, and our lives. It will provide each and every one of us with a truly unique sense of independence. It will mark the end of oil-influenced politics, and the beginning of a bright new millennium - a time in which we all will have our own unlimited sources of nonpolluting energy. However, it will not come without a struggle, as history has already shown. The Coming Energy Revolution provides us with an intriguing and insightful look at the forces behind the free-energy movement. The Coming Energy Revolution introduces us to some of the inventors, both past and present, who have insisted that we are surrounded by a sea of energy that we can tap once we have learned nature's secrets. Conventional science says that space is cold and still, and that what energy does exist cannot be put to useful work. The new-energy innovators say that conventional science is wrong, and that new-energy research is being suppressed by a combination of scientific inertia and corporate self-interest. But the suppression cannot last, as this book shows - there are simply too many inventors who are close to new-energy breakthroughs. The Coming Energy Revolution examines the technologies on which these inventors are working. There are magnets that can redirect the energy of space. There is a gentler form of nuclear energy that can take place on a table top. There is hydrogen, a clean, abundant fuel that can be produced wherever needed. There is a form of hydropower that does not rely on massive dams. And there are other forms of new energy. The Coming Energy Revolution looks at them all, and at the kinds of changes that will be needed to overcome the roadblocks between our old-energy present and our new-energy future.
