*Steps to an Ecology of Mind* Gregory Bateson, 2000 Gregory Bateson was a philosopher, anthropologist, photographer, naturalist, and poet, as well as the husband and collaborator of Margaret Mead. This classic anthology of his major work includes a new Foreword by his daughter, Mary Katherine Bateson. 5 line drawings.

**Jaws** Sandra Kahn, Paul R. Ehrlich, 2018-04-10 There's a silent epidemic in western civilization, and it is right under our noses. Our jaws are getting smaller and our teeth crooked and crowded, creating not only aesthetic challenges but also difficulties with breathing. Modern orthodontics has persuaded us that braces and oral devices can correct these problems. While teeth can certainly be straightened, what about the underlying causes of this rapid shift in oral evolution and the health risks posed by obstructed airways? Sandra Kahn and Paul R. Ehrlich, a pioneering orthodontist and a world-renowned evolutionist, respectively, present the biological, dietary, and cultural changes that have driven us toward this major health challenge. They propose simple adjustments that can alleviate this developing crisis, as well as a major alternative to

orthodontics that promises more significant long-term relief. Jaws will change your life. Every parent should read this book.

*Breath* James Nestor, 2020-05-26 A New York Times Bestseller A Washington Post Notable Nonfiction Book of 2020

Named a Best Book of 2020 by NPR “A fascinating scientific, cultural, spiritual and evolutionary history of the way humans breathe—and how we’ve all been doing it wrong for a long, long time.” —Elizabeth Gilbert, author of *Big Magic* and *Eat Pray Love* No matter what you eat, how much you exercise, how skinny or young or wise you are, none of it matters if you’re not breathing properly. There is nothing more essential to our health and well-being than breathing: take air in, let it out, repeat twenty-five thousand times a day. Yet, as a species, humans have lost the ability to breathe correctly, with grave consequences. Journalist James Nestor travels the world to figure out what went wrong and how to fix it. The answers aren’t found in pulmonology labs, as we might expect, but in the muddy digs of ancient burial sites, secret Soviet facilities, New Jersey choir schools, and the smoggy streets of São Paulo. Nestor tracks down men and women exploring the hidden science behind ancient breathing practices like Pranayama, Sudarshan Kriya, and Tummo and teams up with pulmonary tinkerers to scientifically test long-held beliefs about how we breathe. Modern research is showing us that making even slight adjustments to the way we inhale and exhale can jump-start athletic performance; rejuvenate internal organs; halt snoring, asthma, and autoimmune disease; and even straighten scoliotic spines. None of this should be possible, and yet it is. Drawing on thousands of years of medical texts and recent cutting-edge studies in pulmonology, psychology, biochemistry, and human physiology, *Breath* turns the conventional wisdom of what we thought we knew about our most basic biological function on its head. You will never breathe the same again.

**Trauma-Aware Yoga and Movement Therapeutics for Older Adults** Beth Spindler, 2023-05-08 Discover the yoga and movement therapies at the heart of health in later life through this accessible guide for teachers and therapists. Beth Spindler has devised innovative movement practices based around acknowledging the trauma and vulnerability that come with a lifetime of memories. Trauma can exacerbate the effects of illnesses and conditions common in older adults, including depression, dementia, Parkinson's and arthritis. The movement and yoga therapeutics in this volume take a holistic approach to healing trauma alongside gentle practices to aide in managing symptoms in later life. Each chapter takes on a different condition or situation, explores how they can relate to trauma, and provides both the physical movement and the breathing exercises to address the issue. Complete with illustrations and adaptations for any setting or ability, the practices in this guide are suitable for many practitioners working with either individuals or groups.

Ancient Appetites Oisín McGann,2015-08-11 “An exciting new steampunk adventure” featuring living machines, murderous betrayals, and Ireland’s most ruthless family (School Library Journal). The slow collapse of the British Empire in the nineteenth century meant opportunity for anyone with ammunition and wit. Now the Wildensterns are by far the most powerful family—and the most ruthless. Trained from childhood in the arts of assassination and conspiracy and endowed with the supernatural ability to live for more than a century, the clan has grown rich, vicious, and seemingly invincible. After nearly two years away, eighteen-year-old Nate has returned. But his homecoming is shattered when his eldest brother, Marcus, is mysteriously killed. Following the Rules of Ascension, which allow one male family member to murder another, Nate is being blamed. Nate knows he isn’t the murderer, but who is? With the help of his sister-in-law, Daisy, and his cousin Gerald, Nate intends to find out. Their investigation brings them into the underbelly of the Wildenstern empire, where living machines, conspiring relatives, and undercover mercenaries do their dirty work. But when a disaster uncovers the ancient remains of Wildenstern ancestors, the lives of the family members and their struggle for power will take a bizarre and gruesome turn.

*LESSONS TO A YOUNG PRINCE, BY AN OLD STATESMAN, ON THE PRESENT DISPOSITION IN EUROPE TO A GENERAL REVOLUTION* ,1790

Our Dogs, Ourselves Alexandra Horowitz, 2019-09-03 From the #1 New York Times bestselling author of *Inside of a Dog* and *The Year of the Puppy*, an eye-opening, informative, "entertaining, and enlightening" (BookPage) celebration of the

human-canine relationship for the curious dog owner and science-lover alike. We keep dogs and are kept by them. We love dogs and (we assume) we are loved by them. We buy them sweaters, toys, shoes; we are concerned with their social lives, their food, and their health. The story of humans and dogs is thousands of years old but is far from understood. In *Our Dogs, Ourselves*, Alexandra Horowitz explores all aspects of this unique and complex relationship that “dog lovers will savor and absorb” (Shelf Awareness). As Horowitz considers the current culture of dogdom, she reveals the odd, surprising, and contradictory ways we live with dogs. We celebrate their individuality but breed them for sameness. Despite our deep emotional relationships with dogs, legally they are property to be bought, sold, abandoned, or euthanized as we wish. Even the way we speak to our dogs is at once perplexing and delightful. In thirteen thoughtful and charming chapters, *Our Dogs, Ourselves* affirms our profound affection for this most charismatic of animals—and makes us “see canine companions in new ways” (Science News).
