Water and Conflict: Incorporating Peacebuilding Into Water Development Jason Gehrig, Mark M.

Rogers, 2009-08-14 Water is a simple but necessary part of life. Yet much of the world's population lacks adequate clean water, either because of physical scarcity or because they are denied equitable access to water resources. Such conditions inevitably breed conflict. Water-related violence is common in many parts of the world and is generally expected to increase in the years ahead. This document is intended to assist water development practitioners, civil society peacebuilders and human rights advocates seeking to integrate water and peacebuilding in their work. The purpose is twofold: to furnish a conceptual framework for understanding problems of scarcity and equity, and to provide practical guidance and tools for

action. The text distills an extensive literature on water, conflict, and cooperation produced in recent years by researchers and development practitioners. Case studies and reflections are included to keep theory grounded in reality.

The Rules of the Game and the Game of the Rules Rutgerd Boelens, 2008 This thesis has a threefold setup.

Ancient Irrigation Systems of the Aral Sea Area Boris V. Andrianov, 2013-12-31 Ancient Irrigation Systems in the Aral Sea Area, is the English translation of Boris Vasilevich Andrianov's work, *Drevnie orositelnye sistemy priaralya*, concerning the study of ancient irrigation systems and the settlement pattern in the historical region of Khorezm, south of the Aral Sea (Uzbekistan). This work holds a special place within the Soviet archaeological school because of the results obtained through a multidisciplinary approach combining aerial survey and fieldwork, surveys, and excavations. This translation has been enriched by the addition of introductions written by several eminent scholars from the region regarding the importance of the Khorezm Archaeological-Ethnographic Expedition and the figure of Boris V. Andrianov and his landmark study almost 50 years after the original publication.

Agrindex, 1991

How Do Irrigation Systems Work? Charles Hofer, 2016-07-15 An irrigation system is an arrangement of canals and conduits that bring water to crops that need it. Even the earliest civilizations found ways to irrigate their crops with water from nearby rivers. In time, simple canals gave way to more advanced technology, leading to today's massive irrigation systems. In this book, readers will explore essential STEM topics while learning the fascinating history behind irrigation systems, including their different parts, how they are used, and the amazing engineers and scientists who make them possible. The text was designed to reflect social studies and science curricula. Photographs, diagrams, and fact boxes are sure to capture the attention of even reluctant readers.
