Freedom in the World 2006 Freedom House,2006 Freedom in the World, the Freedom House flagship survey whose findings have been published annually since 1972, is the standard-setting comparative assessment of global political rights and civil liberties. The survey ratings and narrative reports on 192 countries and a group of select territories are used by policy makers, the media, international corporations, and civic activists and human rights defenders to monitor trends in democracy and track improvements and setbacks in freedom worldwide. Press accounts of the survey findings appear in hundreds of influential newspapers in the United States and abroad and form the basis of numerous radio and television reports. The Freedom in the World political rights and civil liberties ratings are determined through a multi-layered process of research and evaluation by a team of regional analysts and eminent scholars. The analysts used a broad range of sources of information, including foreign and domestic news reports, academic studies, nongovernmental organizations, think tanks, individual professional contacts, and visits to the region, in conducting their research. The methodology of the survey is derived in large measure from the Universal Declaration of Human Rights, and these standards are applied to all countries and territories, irrespective of geographical location, ethnic or religious composition, or level of economic development.

Claiming the Stones, Naming the Bones Elazar Barkan,Ronald Bush,2003-01-09 These fourteen essays address controversies over a variety of cultural properties, exploring them from perspectives of law, archeology, physical anthropology, ethnobiology, ethnomusicology, history, and cultural and literary study. The book divides cultural property into three types: Tangible, unique property like the Parthenon marbles; intangible property such as folktales, music, and folk remedies; and communal representations, which have lead groups to censor both outsiders and insiders as cultural traitors.

Gender Equality and Work-Life Balance Sarah Blithe,2015-06-05 Pressure to achieve work-life balance has recently become a significant part of the cultural fabric of working life in United States. A very few privileged employees tout their ability to find balance between their careers and the rest of their lives, but most employees face considerable organizational and economic constraints which hamper their ability to maintain a reasonable balance between paid work and other life aspects—and it is not only women who struggle. Increasingly men find it difficult to do it all. Women have long noted the near impossibility of balancing multiple roles, but it is only recently that men have been encouraged to see themselves beyond their breadwinner selves. *Gender Equality and Work-Life Balance* describes the work-life practices of men in the United States. The purpose is to increase gender equality at work for all employees. With a focus on leave policy inequalities, this book argues that men experience a phenomenon called the glass handcuffs, which prevents them from leaving work to participate fully in their families, homes, and other life events, highlighting the cultural, institutional, organizational, and occupational conditions which make gender equality in work-life policy usage difficult. This social justice book ultimately draws conclusions about how to minimize inequalities at work. *Gender Equality and Work-Life Balance* is unique as it laces together some theoretical concepts which have little previous association, including entrepreneurialism; leave policy, occupational identity, and the economic necessities of families. This book will therefore be of particular interest to researches and academics alike in the disciplines of Gender studies, Human Resource Management, Employment Relations,

Sociology and Cultural Studies.

Archaeology Bjørnar Olsen, 2012-11-19 “This book exhorts the reader to embrace the materiality of archaeology by recognizing how every step in the discipline’s scientific processes involves interaction with myriad physical artifacts, ranging from the camel-hair brush to profile drawings to virtual reality imaging. At the same time, the reader is taken on a phenomenological journey into various pasts, immersed in the lives of peoples from other times, compelled to engage their senses with the sights, smells, and noises of the publics and places whose remains they study. This is a refreshingly original and provocative look at the meaning of the material culture that lies at the foundation of the archaeological discipline.”—Michael Brian Schiffer, author of *The Material Life of Human Beings* “This volume is a radical call to fundamentally rethink the ontology, profession, and practice of archaeology. The authors present a closely reasoned, epistemologically sound argument for why archaeology should be considered the discipline of things, rather than its more commonplace definition as the study of the human past through material traces. All scholars and students of archaeology will need to read and contemplate this thought-provoking book.”—Wendy Ashmore, Professor of Anthropology, UC Riverside A broad, illuminating, and well-researched overview of theoretical problems pertaining to archaeology. The authors make a calm defense of the role of objects against tedious claims of 'fetishism.'—Graham Harman, author of *The Quadruple Object*

Pioneer to the Past (Abridged, Annotated) Charles Breasted, 1945-01-01 The challenging and exciting life of James Henry Breasted spanned the most important years of the early western exploration of ancient Egypt. He was at the center of turbulent and world-changing events, including World War I and the discovery of the tomb of Tutankhamun by Howard Carter. An immensely talented scholar, he explored the Nile Valley and its antiquities in the late 19th and early 20th centuries, recording inscriptions and participating in digs with men like Petrie. At his side was his wife, as well as his son Charles, who wrote this admiring work about the life and times of his father. James Breasted was consulted with by such men as General Allenby during WWI. When Howard Carter discovered Tut's tomb in 1922, one of the first men he and his patron, Lord Carnarvon, contacted was Breasted. He not only saw the tomb shortly after its discovery, his effort to mediate between Carter and the Egyptian government when Carter was later locked out of the tomb is detailed here. You cannot understand ancient Egypt or modern Egyptology without knowing about Breasted's remarkable life. He was the founder of the Oriental Institute at the University of Chicago. For the first time, this long out-of-print volume is available as an affordable, well-formatted book for e-readers, tablets, and smartphones. Social and Political Foundations of Constitutions Denis J. Galligan, Mila Versteeg, 2013-10-14 This volume analyses the social and political forces that influence constitutions and the process of constitution making. It combines theoretical perspectives on the social and political foundations of constitutions with a range of detailed case studies from nineteen countries. In the first part leading scholars analyse and develop a range of theoretical perspectives, including constitutions as coordination devices, mission statements, contracts, products of domestic power play, transnational documents, and as reflection of the will of the people. In the second part these theories are examined through in-depth case studies of the social and political foundations of constitutions in countries such as Egypt, Nigeria, Japan, Romania, Bulgaria, New Zealand, Israel, Argentina and others. The result is a multidimensional study of constitutions as social phenomena and their interaction with other social phenomena.

Buyology Martin Lindstrom, 2010-02-02 NEW YORK TIMES BESTSELLER • “A fascinating look at how consumers perceive logos, ads, commercials, brands, and products.”—Time How much do we know about why we buy? What truly influences our decisions in today’s message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can “cool” brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? *Buyology* is a fascinating and shocking journey into the mind of today’s consumer that will captivate anyone who’s been seduced—or turned off—by marketers’ relentless attempts to win our loyalty, our money, and our minds.

Modern Political Warfare Linda Robinson,Todd C. Helmus,Raphael S. Cohen,2018 The United States today faces a number of actors who employ a wide range of political, informational, military, and economic measures to influence, coerce, intimidate, or undermine U.S. interests or those of friends and allies; many of these measures are often collectively referred to as political warfare. This report analyzes political warfare as it is practiced today by both state and nonstate actors, and provides detailed recommendations regarding the most effective ways that the U.S. government, along with its allies and partners, can respond to or engage in this type of conflict to achieve U.S. ends and protect U.S. interests. The authors examine historical antecedents of political warfare and current-day practices through in-depth case studies of Russia, Iran, and the Islamic State. They use these cases to derive common attributes of modern political warfare. The authors then identify effective means for responding to these challenges. Drawing on documentary and field research as well as extensive semistructured interviews with practitioners in the U.S. government and elsewhere, they determine gaps in practices and capabilities for addressing political warfare threats. The report concludes with recommendations for countering political warfare by creating a more effective, coordinated, and cost-sensitive approach to effective statecraft, including specific measures for the U.S. State Department and the U.S. military, particularly the special operations community.--Publisher's description.
