Infinite Energy Technologies Finley Eversole,2012-12-14 Clean, sustainable energy solutions from the geniuses of our past and the visionaries of our future • Explores five great but nearly forgotten minds of the past--John Worrell Keely, Nikola Tesla, Viktor Schauburger, Royal Raymond Rife, and T. Townsend Brown--and their revolutionary discoveries • Reveals information from leading experts on cold fusion, zero-point energy, power from water, antigravity, and the free-energy potential of the Searl Effect Generator As the global need for clean, renewable energy grows and the shortage of viable large-scale solutions continues, it is time to look to the geniuses of our past and the visionaries of our future for answers. Taking inspiration from Albert Einstein's statement that "Problems cannot be solved by the same level of thinking that created them," Finley Eversole explains that the key to a pollution- and poverty-free future of infinite energy lies not in pursuing one single method, but in investigating all the possibilities--in uniting as a world in creative pursuit of global transformation. Exploring five nearly unknown geniuses of our past--John Worrell Keely, Nikola Tesla, Viktor Schauburger, Royal Raymond Rife, and T. Townsend Brown--and their revolutionary discoveries about free energy, electricity, water vortex motion, electric ray and super-microscope technology, and antigravity, this book helps to restore their long-suppressed scientific legacies and bring us one step closer to the destiny they foresaw. Eversole has gathered research from leading experts on cold fusion, zero-point energy, power from water, and the free-energy potential of the Searl Effect Generator to reveal technologies that work with Nature's laws and that, if fully implemented, could establish sustainable energy systems in a single generation.

**The Awesome Life Force** Joseph H. Cater,1984 1982 the Hermetic Laws of the Universe as Applied to All Phenomena. the most incredible information ever placed between the covers of a book. the greatest mysteries known to man are resolved for the first time in human history and so clearly explained.

**Energy processes in fuel-free electromagnetic generators** Solomon I. Khmelnik,2011-03-08 We present here the theory of functioning for various magnetic fuel free energy generators. The theory is within the confines of the existing physical paradigm. It is shown that such generators (regardless of their construction) draw energy from the environment

similarly to a heat pump. The constructions of generators are not considered here. Open codes for modeling programs in MATLAB are given here.

**The Hunt for Zero Point** Nick Cook, 2007-12-18 This riveting work of investigative reporting and history exposes classified government projects to build gravity-defying aircraft--which have an uncanny resemblance to flying saucers. The atomic bomb was not the only project to occupy government scientists in the 1940s. Antigravity technology, originally spearheaded by scientists in Nazi Germany, was another high priority, one that still may be in effect today. Now for the first time, a reporter with an unprecedented access to key sources in the intelligence and military communities reveals suppressed evidence that tells the story of a quest for a discovery that could prove as powerful as the A-bomb. The Hunt for Zero Point explores the scientific speculation that a zero point of gravity exists in the universe and can be replicated here on Earth. The pressure to be the first nation to harness gravity is immense, as it means having the ability to build military planes of unlimited speed and range, along with the most deadly weaponry the world has ever seen. The ideal shape for a gravity-defying vehicle happens to be a perfect disk, making antigravity tests a possible explanation for the numerous UFO sightings of the past 50 years. Chronicling the origins of antigravity research in the world's most advanced research facility, which was operated by the Third Reich during World War II, The Hunt for Zero Point traces U.S. involvement in the project, beginning with the recruitment of former Nazi scientists after the war. Drawn from interviews with those involved with the research and who visited labs in Europe and the United States, The Hunt for Zero Point journeys to the heart of the twentieth century's most puzzling unexplained phenomena.

**Future Esoteric** Brad Olsen, 2016-04-01 Examining the flaws of mainstream society, this collection of conspiracy theory, esoteric knowledge, and fringe subjects seeks to present solutions to current social, economic, and environmental world issues. This book encourages the exploration and integration of modern science with ancient wisdom, which will lead modern society towards advancement and enlightenment. Topics discussed include religious mythos, government manipulation, technological advances, and utopia.

*Secrets of Antigravity Propulsion* Paul A. LaViolette, 2008-07-10 A complete investigation of the development and suppression of antigravity and field propulsion technologies • Reveals advanced aerospace technologies capable of controlling gravity that could revolutionize air travel and energy production • Reviews numerous field propulsion devices that have thrust-to-power ratios thousands of times greater than a jet engine • Shows how NASA participates in a cover-up to block adoption of advanced technologies under military development In *Secrets of Antigravity Propulsion*, physicist Paul LaViolette reveals the secret history of antigravity experimentation--from Nikola Tesla and T. Townsend Brown to the B-2 Advanced Technology Bomber. He discloses the existence of advanced gravity-control technologies, under secret military development for decades, that could revolutionize air travel and energy production. Included among the secret projects he

reveals is the research of Project Skyvault to develop an aerospace propulsion system using intense beams of microwave energy similar to that used by the strange crafts seen flying over Area 51. Using subquantum kinetics--the science behind antigravity technology--LaViolette reviews numerous field-propulsion devices and technologies that have thrust-to-power ratios thousands of times greater than that of a jet engine and whose effects are not explained by conventional physics and relativity theory. He then presents controversial evidence about the NASA cover-up in adopting these advanced technologies. He also details ongoing Russian research to duplicate John Searl's self-propelled levitating disc and shows how the results of the Podkletnov gravity beam experiment could be harnessed to produce an interstellar spacecraft.

The Ultimate Reality Joseph H. Cater,1998-09 This book is Mr. Cater's follow up work to The Awesome Life Force. It contains countless gems of thought provoking ideas. In this two volume set you will discover an explanation for seemingly unexplainable phenomena. Levitation, missile weight loss in space, pyramid power and a closer look at the properties of light. Joseph Cater points out the fundamental weakness in conventional mathematics. The role of the soft electrons is expanded upon. Magnetic fields and astronomical error in determining planetary sizes and distances are fully explained. Volume 2 carries us into the mystery of the Crystal Skull. Have you ever wondered how from certain rock formations water can be produced? Everything in the process of creation proceeds from the simple to the more complex. If there is a test for the validity of a theory or concept in its ability to be explained Joseph Cater accomplishes it in this set of books. You do not have to be a genius to understand, there is something here for everyone!

*Magnetic Current* Edward Leedskalnin,2023-08 In Magnetic Current, Edward Leedskalnin presents his groundbreaking theories on the nature of magnetism and its relationship to electricity. Through a series of experiments and observations, Leedskalnin challenges conventional understanding of these fundamental forces, offering a unique perspective on the workings of the universe. This book is a must-read for anyone interested in alternative scientific theories and the mysteries of the natural world.

Gravitational Manipulation of Domed Craft Paul E. Potter,2011-03-10 This book introduces a brand new field of scientific research based upon analysis of artifacts retrieved from crashed and damaged UFOs that have come down in Russia and America. For the first time, it reveals the scientific principles behind UFO propulsion dynamics, and shows that these principles are known and recognized by today's physicists. Potter's analyses of these UFO mechanisms are substantiated

with references to a broad array of over 300 research papers published in scientific journals! Potter correlates many of the phenomena observed firsthand by close encounter witnesses and abductees and pinpoints the common themes reported, categorizing them according to known physical principles. He produces a comprehensive orchestration of energy dynamics used inside and around UFOs. His precise and lavish illustrations allow the reader to enter directly into the realm of the advanced technological engineer and to understand, quite straightforwardly, the aliens' methods of energy manipulation: their methods of electrical power generation; how they purposely designed their craft to employ the kinds of energy dynamics that are exclusive to space (discoverable in our astrophysics) in order that their craft may generate both attractive and repulsive gravitational forces; their control over the mass-density matrix surrounding their craft enabling them to alter their physical dimensions and even manufacture their own frame of reference in respect to time.

End of Oblivion: The Great Deceit and Why We Need to Reclaim Our Spiritual Evolution Aleksandar Ostojic, 2019-08-08

End of Oblivion: The Great Deceit and Why We Need to Reclaim Our Spiritual Evolution is an informal overview of the current state of humanity and the world, and delves into how our perceptions of reality have been drastically distorted to the point where the majority of the population cannot perceive distortion any longer. Deceit is present in every area of our lives, but beneath these secular manifestations, deeper metaphysical undercurrents are interlacing with our spiritual, evolutionary direction. Armed with a wealth of factual evidence as well as personal observations, the author puts forth a compelling explanation as to who is really behind this great deceit and offers choices on how to break free for those curious enough to ponder. It is time to remove our blindfolds, to consciously choose our path, and to reclaim the true purpose of our being - our spiritual evolution. The book reflects on the Law of One material.
