*The Great Mosque of Damascus* Finbarr Flood, 2021-07-26 Focussing on the Great Mosque of Damascus, this volume discusses the scope and significance of the building campaign undertaken by the Umayyad caliph al-Walid b. 'Abd al-Malik (86-96/705-15), and its implications for the development of early Islamic visual culture.

**The German Empire, 1871-1918** Hans-Ulrich Wehler, 1985-03 In the wake of the Fischer Controversy on the origins of World War I there emerged in West Germany a younger generation of historians who took a critical 'revisionist' view of the Bismarckian Empire and began to analyze the political development of the Hohenzollern monarchy against the background of the country's social and economic power structures. Professor Wehler became one of the most prominent exponents of this approach and his structural analysis of the 'Kaiserreich' created a considerable stir when it was first published. It has since, with its incisive and rigorous analysis, become a classic in the field.

**Journey to Italy** Heinrich Heine, 1998 Translated by Charles Leland; Introduction by Phillip Lopate The Italian Journey contains celebrated examples of Heine's wit, combining street scenes and art masterpieces with scathing attacks against religious bigotry and reactionary politics. The Baths of Lucca intertwines irony and the expression of romantic sentiments to capture the restlessness that heralded the birth of the modern world. Freud included some of Heine's anecdotes in his own writings on humor and its relation to the unconscious.

**Bilingual** François Grosjean,2010-08-15 Whether in family life, social interactions, or business negotiations, half the people in the world speak more than one language every day. Yet many myths persist about bilingualism and bilinguals. In a lively and entertaining book, an international authority on bilingualism explores the many facets of life with two or more languages.

*Avicenna and the Aristotelian Left* Ernst Bloch,2018-12-11 Ernst Bloch was one of the most significant twentieth-century German thinkers, yet he remains overshadowed by his Frankfurt School contemporaries. Known for his engagement with utopianism and religious thought, Bloch also wrote incisively about ontological questions. In his short masterpiece *Avicenna and the Aristotelian Left*, Bloch gives a striking account of materialism that traces emancipatory elements of modern thought to medieval Islamic philosophers' encounter with Aristotle. Bloch argues that the great medieval Islamic philosopher Avicenna (Ibn Sina) planted the seeds of a radical materialism still relevant for critical theory today. He contrasts Avicenna's and Aquinas's interpretations of Aristotle on form and matter to argue that Avicenna's reading democratizes power and undermines clerical and political authority. Bloch explores Avicenna's world and metaphysics in detail, showing how even his most recondite theoretical concerns prove capable of pointing toward radical social transformation. He blazes an original path through the history of ideas, including Averroes (Ibn Rushd), Spinoza, and Marx as well as lesser-known figures. Here translated into English for the first time, *Avicenna and the Aristotelian Left* is at once a succinct summation of Bloch's own idiosyncratic materialism, a provocative reconstruction of the Western philosophical tradition in light of its exchanges with Islamic thought, and a vital resource for contemporary debates about materialism in critical theory.

**Engineers of Jihad** Diego Gambetta,Steffen Hertog,2017-11-28 A groundbreaking investigation into why so many Islamic radicals are engineers The violent actions of a few extremists can alter the course of history, yet there persists a yawning gap between the potential impact of these individuals and what we understand about them. In *Engineers of Jihad*, Diego Gambetta and Steffen Hertog uncover two unexpected facts, which they imaginatively leverage to narrow that gap: they find that a disproportionate share of Islamist radicals come from an engineering background, and that Islamist and right-wing extremism have more in common than either does with left-wing extremism, in which engineers are absent while social scientists and humanities students are prominent. Searching for an explanation, they tackle four general questions about extremism: Under which socioeconomic conditions do people join extremist groups? Does the profile of extremists reflect how they self-select into extremism or how groups recruit them? Does ideology matter in sorting who joins which group? Lastly, is there a mindset susceptible to certain types of extremism? Using rigorous methods and several new datasets, they explain the link between educational discipline and type of radicalism by looking at two key factors: the social mobility (or lack thereof) for engineers in the Muslim world, and a particular mindset seeking order and hierarchy that is

found more frequently among engineers. Engineers' presence in some extremist groups and not others, the authors argue, is a proxy for individual traits that may account for the much larger question of selective recruitment to radical activism. Opening up markedly new perspectives on the motivations of political violence, *Engineers of Jihad* yields unexpected answers about the nature and emergence of extremism.

*The Interpreter* Natascha Wodin, 1986

**The Chief Witness** Sayragul Sauytbay, 2021-05-04 A shocking depiction of one of the world's most ruthless regimes -- and the story of one woman's fight to survive. I will never forget the camp. I cannot forget the eyes of the prisoners, expecting me to do something for them. They are innocent. I have to tell their story, to tell about the darkness they are in. It is so easy to suffocate us with the demons of powerlessness, shame, and guilt. But we aren't the ones who should feel ashamed. Born in China's north-western province, Sayragul Sauytbay trained as a doctor before being appointed a senior civil servant. But her life was upended when the Chinese authorities incarcerated her. Her crime: being Kazakh, one of China's ethnic minorities. The north-western province borders the largest number of foreign nations and is the point in China that is the closest to Europe. In recent years it has become home to over 1,200 penal camps -- modern-day gulags that are estimated to house three million members of the Kazakh and Uyghur minorities. Imprisoned solely due to their ethnicity, inmates are subjected to relentless punishment and torture, including being beaten, raped, and used as subjects for medical experiments. The camps represent the greatest systematic incarceration of an entire people since the Third Reich. In prison, Sauytbay was put to work teaching Chinese language, culture, and politics, in the course of which she gained access to secret information that revealed Beijing's long-term plans to undermine not only its minorities, but democracies around the world. Upon her escape to Europe she was reunited with her family, but still lives under constant threat of reprisal. This rare testimony from the biggest surveillance state in the world reveals not only the full, frightening scope of China's tyrannical ambitions, but also the resilience and courage of its author.

*Parting from Phantoms* Christa Wolf, 1998-11 Documenting four painful years in the life of German writer Christa Wolf, this volume of essays, letters and diary entries portrays the cultural and political situation in the former German Democratic Republic. An admired writer, Wolf was reviled after the publication of her novel *What Remains*
